

Intel® SCS Setup Wizard

Intel® Setup and Configuration Service Setup Wizard (Intel® SCS Setup Wizard)

Download [Executable File Here](#)

Overview:

This utility is designed to automate the installation of the Intel® Setup and Configuration Service (SCS) along with the third party pre-requisite components automatically. This version replaces all previous releases of the wizard.

The Intel® SCS Setup Wizard will install or verify existing components that are required by the SCS, and then install the service and the Intel® SCS Console. After running the Intel SCS Setup Wizard, the Intel SCS Console can be used to provision Intel® vPro™ technology client systems.

Specifications:

Version:	V 5.1.0983.1
File size:	275.9 MB
Est. download time:	3 min under LAN conditions
Language:	English

Requirements:

Hardware:	<ul style="list-style-type: none">• no specific hardware requirements
Software:	<ul style="list-style-type: none">• The machine must be running Windows Server* 2003, installed on the C: drive.

	<ul style="list-style-type: none"> • The operating system should have all of the latest service packs, driver updates, and critical patches installed. • The machine must be physically connected to a network (a requirement of Microsoft Active Directory* setup). • The machine must be logged into a local administrator account (if not on a domain), or domain administrator account (if already part of a domain). • The original installation media for the operating system must be in the CD/DVD drive or otherwise available (such as on a network share) prior to running the Intel® SCS Setup Wizard. Microsoft IIS and Certificate Authority installations require access to the original operating system installation files. • If you are installing DNS & DHCP with the Wizard, your static IP address should be set to 192.168.1.150
