

Utility Reads Intel(R) AMT FW Revision & DHCP Option 15 DNS Information

Intel® Remote Configuration Certificate Scout

Utility Reads Intel® AMT FW Revision and DHCP Option 15 DNS Information

Download Now![RCFG_support_util_1_0_08304_1.zip](#)

Overview:

The Intel® Remote Configuration Certificate Scout is a simple command line utility that allows users to query a system to detect Intel® AMT Firmware version and DHCP option 15 'DNS domain option name' settings. These values are useful for determining what type of remote configuration certificate your system can support. This utility supports Intel® AMT systems, and will work on either provisioned or unprovisioned systems.

This utility was developed as part of a future product, but we found it so handy - we're releasing it stand-alone. Wait until you see it's companion utility!

This utility runs locally on the Intel® AMT client.

Specifications:

Version:	v. 1.0.08304.1
File size:	81.5 KB
Est. download time:	1-3 sec under LAN conditions

Language:	English
