## Getting Started

### [Introduction to Intel® vPro™ Technology](#)

Jeff Torello covers the basics of Intel vPro Technology in this webinar. Learn what it is, how you can use it to simplify your IT environment, and next steps for activating your PCs with Intel vPro technology.

*Aired 8.19.09*

### [The Bottom Line on Hardware Refresh](#)

IT capital budgets are more challenging than ever. Many IT departments have postponed their PC refresh, but applying models from the corporate finance office can reveal the true costs of older hardware. Intel and Dell subject matter experts take an in-depth look at the balance sheet to help you determine an optimal refresh cycle.

## Management Consoles

### [Microsoft System Center Configuration Manager](#)

#### [Activate Today! Realize ROI with Intel® vPro Technology and Microsoft System Configuration Manager](#)

Join the team from the Intel vPro Expert Center for an informative Webcast on the ROI savings and activation process for PCs with Intel® vPro™ technology and Microsoft System Configuration Manager.

*Aired 7.15.09*

#### [Intel® vPro™ Technology with Microsoft System Center - Session 1](#)

This webinar covers the important prerequisites for the infrastructure and configurations necessary in Microsoft System Center Configuration Manager (SCCM) to take advantages of the Intel vPro use cases – Power Management and Remote Diagnostic and Repair. After this session, you will have a general understanding how to configure your SCCM SP1 environment to support Intel vPro technologies and start leveraging the use cases to improve support for the end customer. For detailed explanation of all configuration steps, it will be necessary to review the online training session: <http://bit.ly/Hn2n>

*Aired 5.8.09*

### **[Intel® vPro™ Technology with Microsoft System Center - Session 2](#)**

The webinar covers Intel(r) vPro technology features, such as built-in manageability, proactive security, and energy-efficient performance. This session will demonstrate how you can take advantage of Microsoft System Center's Configuration Manager 2007 SP1 to provision, discover, accomplish help desk features to break/fix, and do remote power control for Intel vPro clients.

*Aired 5.22.09*

## **Symantec Altiris**

### **[Enhancing the Symantec Management Platform \(Altiris\) with Intel® vPro™ Technology](#)**

Terry Cutler, a Solution Architect at Intel, discusses the benefits of using the Symantec Management Platform to manage your PCs with Intel vPro technology. Terry demos several use cases in this webinar.

*Aired 9.2.09*

[Resources and recording from Symantec Altiris & Intel vPro webinar](#)

### **[Activate Today! Realize ROI with Intel® vPro Technology and Symantec Altiris](#)**

Join the team from the Intel vPro Expert Center for an informative Webcast on the ROI savings and activation process for PCs with Intel® vPro™ technology and Symantec Altiris.

*Aired 7.8.09*

[Recording and Q&As Available: Activate Today! Realize ROI with Intel® vPro Technology and Symantec Altiris](#)

### **[Lower Your IT Manageability Costs with Intel vPro Technology and Symantec Altiris CMS](#)**

Nearly 90 percent of an organization's IT budget and time is spent keeping their business running securely and smoothly. When provisioned with Altiris solutions,

computers with Intel vPro processor technology allow unprecedented ability to solve business IT problems.

*Aired 4.16.09*

## **Technologies**

### **Dynamic Virtual Client**

#### [Introduction to Dynamic Virtual Client with Intel vPro Technology](#)

This webinar will go over the spectrum of client computing models and guide you towards the model that accomplishes centralized management, policy-driven data security with client-side computing. Intel® vPro™ Technology can be leveraged to ease your Windows 7 operating system enterprise deployment and reduce the end user disruptiveness the transition may cause.

[Watch it on-demand! Intro to DVC recording now available](#)

*Aired 11.17.09*

### **Intel Anti-Theft Technology**

#### [Securing Your Environment with Intel Anti-Theft Technology](#)

Today's business environment is extremely difficult. All types of organizations are being asked to do more with less. And with the cost and impact of PC theft, security has become even more important to corporations and IT leaders. Join us to hear how IT professionals can take advantage of new technologies to protect their business. Join Dr. Larry Ponemon (Ponemon Institute), Mike Schulien (Intel), and Geoff Glave (Absolute Software) as they discuss the impact of data breaches, Intel Anti-Theft technology, and Computrace Software from Absolute.

[Click to read the Q & As.](#)

*Aired 6.23.09*

### **Intel® Anti-Theft Technology with Absolute Software**

This webinar introduces Intel® Anti-Theft Technology (Intel® AT). Intel AT provides a set of hardware and software security building blocks to disable lost/stolen laptops with a poison pill, disable access to data, and allow simple and secure reactivation for recovered laptops.

*Aired 6.2.09*

## **Microsoft Windows 7\***

### **Windows 7 and Intel vPro Technology - Technical Overview**

This webinar will give you a technical overview of the Windows 7 operating system and Intel® vPro™ Technology and how they complement each other to enhance the manageability and security of the business client. The webinar will also focus on how Intel® vPro™ Technology can be leveraged to ease your Windows 7 operating system enterprise deployment and reduce the end user disruptiveness the transition may cause.

[Miss the Win7 and Intel vPro technical webinar? Recording now available.](#)

*Aired 11.18.09*

## **Use Cases**

### **Power Management**

#### **Energy Efficient Performance with Intel® vPro™ Technology and Verdiem Surveyor**

The webinar focuses on Intel® vPro™ technology's energy efficient performance and how it can save money by reducing PC energy usage. This session includes demos of specific use cases with Verdiem Software.

*Aired 6.19.09*
