

# PET MIB files

---

May 28, 2009

New to vPro world! TI learnt that the PET events generated vPro are received by SNMP manager / receiver. I want to know, do I need to compile any MIB files so that the SNMP Manager can understand them better? If yes, where can I get these MIB files.

Thanks in advance

Hello and welcome to the Intel vPro World!

Due to the nature of your question, I think you might get better responses from the Intel Manageability Developer Community. Check it out here:

<http://software.intel.com/en-us/forums/manageability-software-development>

Thanks for your question!
